

Bespoke Jet Bot Combo™ Robot Vacuum and Mop with All-in-One Clean Station® with Auto Steam VR7MD96514G

SAMSUNG

Signature Features

All-in-One Clean Station with Auto Steam

- Automatically cleans and maintains the mop pads with hot water and steam then dries them with hot air. The Clean Station also automatically empties the dustbin, refills the robot with water, and recharges the battery for hassle-free maintenance.

Outstanding Cleaning Performance

- Powerful, dual mop pads spin rapidly at 170 rpm for deep cleaning of dirt and stains.

LiDAR Navigation with 3D Mapping

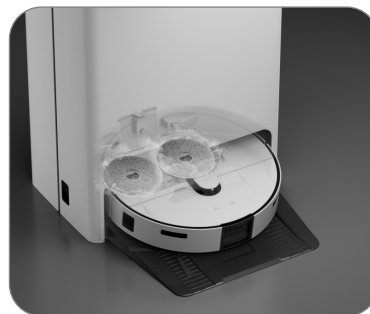

- Upgraded LiDAR sensor increases detection distance by 36% and widens detection area by 79% to create an accurate, 3D map of your home.*

*Based on internal testing compared to Jet Bot VR8000 model with a conventional LiDAR sensor.

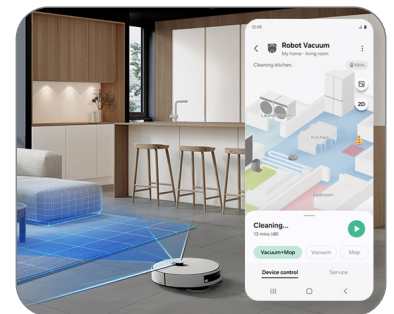

Available Color

Satin Greige

All-in-One Clean Station with Auto Steam

LiDAR Navigation with 3D Mapping

Features

- All-In-One Clean Station with Auto Steam
- Auto Wash
- Auto Dry
- Auto Dust Empty
- Auto Refill
- Floor Detect
- LiDAR Navigation with 3D Mapping
- Powerful Spinning Mop Pads
- Powerful Vacuuming
- 4 Different Cleaning Modes
- Bixby Voice Recognition

Accessories

- Dust Bag (1 installed)
- Mop Pads (2 installed)
- Side Brush (1 installed)
- Pre-Motor Filter (1 installed)
- Mop Pad Holders
- Washing Plate

Bespoke Jet Bot Combo™ Robot Vacuum and Mop with All-in-One Clean Station® with Auto Steam VR7MD96514G

SAMSUNG

Features

All-In-One Clean Station with Auto Steam – Provides hassle-free maintenance for the user. Steam is sprayed on the mop pads after cleaning to keep them hygienic and odor-free.

Auto Wash – High temperature steam and water cleans mop pads to remove dirt and dust.

Auto Dry – Uses hot air to dry and remove residual moisture from the wet mop pads.

Auto Dust Empty – Removes 99.999% of fine dust using Air Pulse technology and a multi-layered filtration system.¹

Auto Refill – Bespoke Jet Bot Combo returns to Clean Station to refill water tank when empty.

Floor Detect – Detects and distinguishes different floor and carpet types and automatically optimizes its cleaning and mopping modes.

LiDAR Navigation with 3D Mapping – Upgraded LiDAR covers a 79% wider range compared to conventional LiDAR to better avoid obstacles and create a precise 3D map of your home.²

Powerful Spinning Mop Pads – Dual rotation mop pads spin rapidly at 170 rpm for deep cleaning and effective stain removal.

Powerful Vacuuming – High-efficiency motor generates powerful suction to pick up hard-to-get hair, dirt, and fine dust particles.

4 Different Cleaning Modes – Lets you adjust how it cleans to suit your preferences and floor conditions.

Bixby Voice Recognition – Use Samsung Bixby voice recognition assistant on your smartphone to clean your home using only voice commands.
